JUDGING PROCESS AND TIMETABLE

30 November 2018
Call for entries launched

21 February 2019
Deadline for receipt of submissions

March 2019
Entries are scored remotely by each judging panel against the award criteria. The scores are forwarded to the category chairs, who make their recommendation on the shortlisted entries

April 2019
The awards shortlist is announced and shortlisted submissions notified. Shortlisted projects are expected to register and participate in the 5th European Healthcare Design Congress to present their project in a poster display and receive their award. The shortlisted projects in each category are limited to three to maintain the awards' integrity, with each shortlisted project guaranteed to receive an award either as a category winner or as a highly commended project

18 June 2019
Awards ceremony in final congress session at 5th European Healthcare Design 2019 Congress, Royal College of Physicians

July 2019
Publication of award winners on Architects for Health, European Healthcare Design and SALUS Global Knowledge Exchange websites, and via press announcements in national, professional and social media channels

EUROPEAN HEALTHCARE DESIGN AWARDS 2019:
RECOGNISING DESIGN EXCELLENCE IN THE HEALTHCARE ENVIRONMENT

The European Healthcare Design Awards 2019 celebrate and recognise professional and research excellence in the design of healthcare environments both in Europe and around the world

The European Healthcare Design Awards 2019 aim to have a significant influence on the creation of healthcare environments that promote health and wellness, embed quality improvement, and support the delivery of treatment and care in an accessible, sustainable and equitable way.

Organised by Architects for Health and SALUS Global Knowledge Exchange, the awards are an integral feature of the prestigious 5th European Healthcare Design 2019 Congress & Exhibition, and they contribute towards the development of knowledge and standards in the design of healthcare environments around the world.

Comprising ten categories across primary, community, secondary and tertiary levels of international healthcare provision and delivery, the awards are presented at an illustrious ceremony during the final session of the Congress, followed by a celebratory garden party in the medicinal gardens of the Royal College of Physicians.

Recipients of the awards will be multidisciplinary project teams which have demonstrated outstanding vision, leadership and knowledge in the design, development and implementation of projects that have positively transformed the delivery and experience of healthcare for the patients and community they serve.

Who should enter?

The awards are open to international organisations and project teams in the public, private and academic sectors, participating in research, planning, procurement, design, construction and/or operation of healthcare facilities and environments.

Eligibility

Built projects or research programmes completed between 1 January 2018 and 1 June 2019 are eligible to enter.
The exception is the Future Healthcare Design Award, which only allows submissions of projects currently in design development or under construction. Projects may be entered into multiple categories, provided they are tailored to meet the specific requirements for the judging criteria of each award, but may not be re-entered in the same category in subsequent years. The closing date for submissions is 21 February 2019.

Evaluation committee

The awards evaluation committee features international researchers, practitioners and policy advisors, who bring specialist multidisciplinary expertise to the specific categories they have been invited to judge.

The shortlist and winner of each award are determined by a category chair, supported by two other judges with proven expertise in their field. This robust evaluation methodology ensures a balanced and transparent decision-making process.

Any judge associated with any of the entries will withdraw from the relevant part of the adjudication process. The award recommendations of the category chairs are then approved by a second review committee.

Judging criteria

The specific judging criteria for each award category are available to download at www.europeanhealthcaredesign.eu prior to completing a formal online submission.

How to submit

To submit, visit www.europeanhealthcaredesign.eu and click on the Awards navigation in the top menu bar.
Step 1: Choose the award category or categories you are entering
Step 2: Complete the online entry form and the 1000-word submission statement relevant to the category you are entering
Step 3: Upload a maximum of 10 images of the project both as a 10-slide PPT/ PDF format and in high-resolution jpeg format, and, if available, a video link of the project from either YouTube or Vimeo.
Step 4: Complete payment to register your submission

Important notes: The submission statement and associated materials MUST explicitly address the criteria outlined on the submission statement forms. Please refer to the rules of entry for further information on payment and submission requirements.

For any questions or further information, please contact info@europeanhealthcaredesign.eu

RULES OF ENTRY

Please read these rules carefully before submitting your entry. Any failure to comply may lead to its rejection.

1. Entries must reflect the criteria set out against each award and comprise the following items generated through the online submission process:

i) Completed entry form.

ii) Completed submission statement for the category or categories being entered, providing a project summary and addressing the award criteria in no more than 1000 words in total.

iii) Ten images of the project, supplied in both a 10-slide Powerpoint or PDF presentation and as high-resolution jpeg images. Submissions for the architectural-based categories should include interior and exterior photographs and any plans and drawings demonstrating key features of the project (eg, a site plan and a floor plan). These illustrations must also be supplied as high-resolution (300+dpi) images during Step 3 of the online submission process. Images in the slide presentation may include small text captions, but any text should be removed from the high-resolution images.

iv) The standard fee for each entry is £130 + VAT. Members of Architects for Health are entitled to a discounted submission fee of £100 + VAT. Payment should be made by completing the credit card details in Step 4 of the online submission process.

v) Agreement of the commissioning authority, building/project owner or other key authority as appropriate to the project submission.

2. Any of the judges must be allowed reasonable access to make enquiries or request further information on a shortlisted submission.

3. The judges have absolute discretion to reject any entry that does not comply with the requirements of the rules; to determine the category for which any entry is eligible; and to make or withhold any award to any entry. The judges' decision is final and binding on all entrants, and no discussion or correspondence relating to the judges' decisions will be entered into.

4. It is a condition of entry that all written material, plans and images submitted may be reproduced by Architects for Health and SALUS Global Knowledge Exchange at no cost to themselves in such a form and in such media as deemed appropriate in announcing and/or promoting the 2019 and 2020 awards, and associated media and exhibition activities. This includes entry into the SALUS project database at www.salus.global.

5. All information regarding the results will be embargoed for publication until after the Awards Presentation Ceremony on 18 June 2019.

6. Entries must arrive no later than Thursday 21 February 2019 using the online submission process at www.europeanhealthcaredesign.eu

Any questions on the submission process should be directed to info@europeanhealthcaredesign.eu and not directly to any of the judges.

EUROPEAN HEALTHCARE DESIGN AWARDS 2019 CATEGORIES

Full detailed submission criteria are available at www.europeanhealthcaredesign.eu

Healthcare Design
(Over 25,000 sqm)
Lead judge: Kate Copeland, chair, Australian Health Design Council, Australia

Sponsored by:
Guldmann

An outstanding healthcare project in a secondary or tertiary care setting that demonstrates high levels of sustainability and urban integration, creates an effective clinical environment, promotes service improvement, and provides a supportive environment for staff, patients and their families.

Healthcare Design (Under 25,000 sqm)
Lead judge: Liesbeth Van Heel, senior policy advisor, Erasmus University Medical Centre, Netherlands

An outstanding healthcare project in a community or primary care setting that demonstrates high levels of sustainability and urban integration, transforming the quality of care services in an accessible location, and supporting the integrated needs of staff, patients and the community. *Submissions may include but are not restricted to GP premises, primary care centres, urgent care centres, integrated health hubs, community hospitals and multi-use polyclinics.*

Health and Life Sciences Research
Lead judge: David Powell, development director, Alder Hey Children's Hospital, UK

An outstanding health and life sciences project that supports the alignment of training and education, clinical research, informatics, innovation and healthcare delivery, with a focus to improve patient and population health outcomes by translating research into practice to develop integrated health services.

Mental Health Design
Lead judge: Jonathan Erskine, director, European Health Property Network, UK

A mental health project that, through innovative design thinking, achieves a reconciliation between the needs of the patient/resident for a humanistic environment that supports ongoing therapy, care and recovery, and the requirement for appropriate levels of safety, security and supervision.

Design for Adaptation and Transformation
Lead judge: Visiting Professor Jim Chapman, Manchester School of Architecture, UK

An outstanding healthcare project that is small in scale but has a high transformational impact on resolving complex and difficult service design challenges in a location with significant constraints. *Submissions may include, but are not restricted to conversions, extensions, infills, refurbishments and exterior projects.*

Design for Health and Wellness
Lead judge: Dr Liz Paslawsky, consultant advisor, SALUS Global Knowledge Exchange, Australia

An inspirational project that encompasses services outside of traditional healthcare settings and, through an alignment of the care philosophy with the design of the environment, helps promote positive behaviours towards healthy living and wellness. *Submissions may include, but are not restricted to, outreach centres, home care, dementia care and continuing care settings.*

Interior Design and Arts
Lead judge: Alexandra Coulter, director, Arts & Health South West, UK

An inspirational project that demonstrates exceptional skill in creating a compassionate healthcare environment that reflects and communicates the values of the healthcare provider through the integrated application of interior design with the visual arts.

Future Healthcare Design
Lead judge: Cliff Harvey, director, Union of International Architects Public Health Group, Canada

Sponsored by:
IHP
Integrated Health Projects by VINCI · Sir Robert McAlpine

A future healthcare project that can demonstrate the potential for outstanding outcomes in masterplanning, place making, wellness and sustainability, in alignment with the strategic requirements of the healthcare provider to transform their services within the wider community, regional or national health system. *Submissions must be 'real' projects developed in design but not yet built to completion. Concept designs will not be considered.*

Design Research Project
Lead judge: Goran Lindahl, associate professor, Chalmers, Sweden

Sponsored by:
Medical Architecture

An independently assessed, completed and novel research study that can demonstrate innovation, relevance and practical application. The research should be original, showing critical thinking in a new field of investigation or by applying innovative methods and analysis to existing issues.

Design Innovation for Quality Improvement
Lead judge: Jonathan West, Helen Hamlyn Centre for Design, Royal College of Art, UK

An innovation in system or service design, technology or industrial design that has had a transformational impact on the design of healthcare services and/or the patient experience, improving the quality, efficiency, sustainability and accessibility of care in a specific healthcare setting or across the continuum of primary, community and secondary care.
