

TELEMEDICINE AND THE FUTURE OF DISRUPTION

June 11, 2018

B A L L I N G E R

SPEAKERS

LOUIS A. MEILINK, JR.
AIA, ACHA, ACHE
PRINCIPAL

CHRISTINA GRIMES
AIA, LEED AP BD+C, EDAC
SENIOR PROJECT HEALTHCARE PLANNER

AGENDA

WHY IS TELEMEDICINE NEEDED?

- Access
- Cost
- Staff retention
- Chronic patient needs

WHAT IS TELEMEDICINE?

- Virtual visit
- Chronic care management
- Inpatient access to specialists
- Opportunities for clinician engagement

WHERE IS TELEMEDICINE?

WHY IS TELEMEDICINE NEEDED?

U.S ANOMALY IN HEALTH AND SOCIAL SPENDING

HEALTHIEST COUNTRIES INDEX

1. Italy
2. Iceland
3. Switzerland
4. Singapore
5. Australia
6. Spain
7. Japan
8. Sweden
9. Israel
10. Luxembourg

THE EVOLVING QUADRUPLE AIM

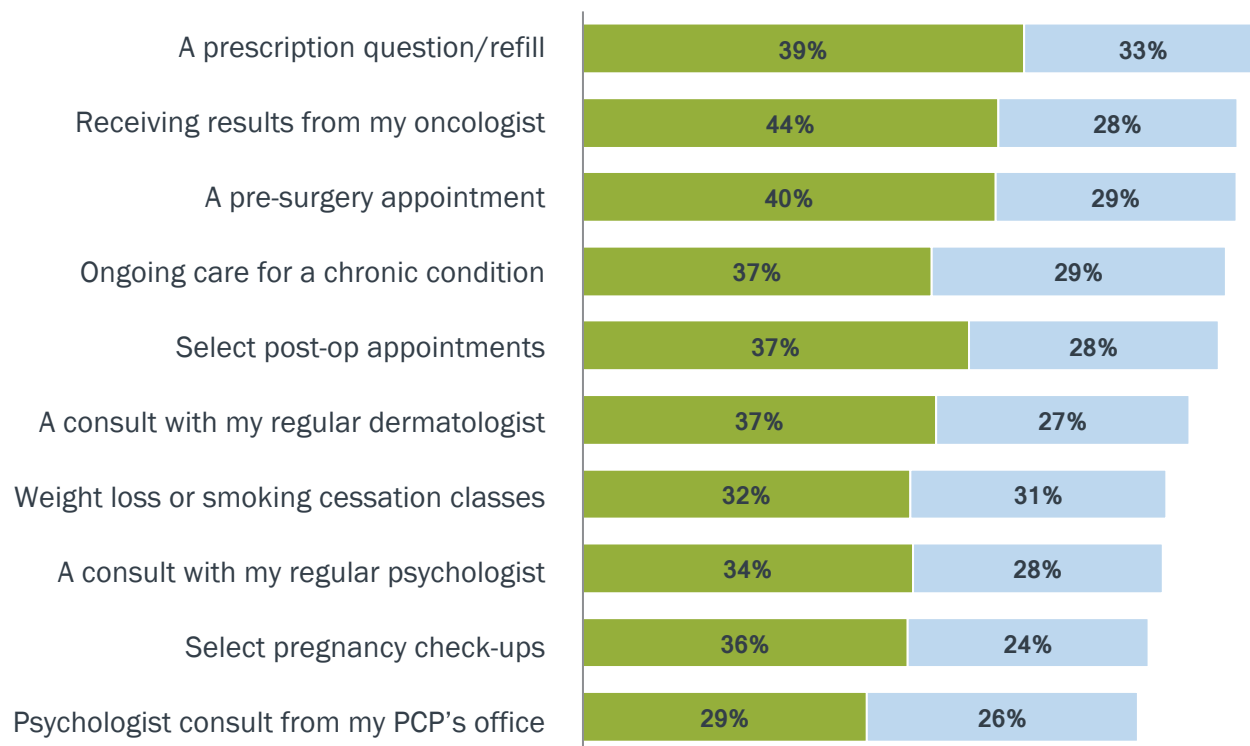

Delivering the Right Care, for the Right Price, at the Right Time – in the Right Place

TELEMEDICINE DRIVERS

CONSUMERISM

CONSUMERS' TOP 10 VIRTUAL VISIT USE CASES

80% of internet users in the US have searched for health related information online

Pew Research Center

PATIENT VALUE PROPOSITION

Shorter wait times to next appointment

No need to travel for care

Visit in the privacy of home

More frequent and ongoing care

NEARLY ONE HALF
OF ALL AMERICANS SUFFER
FROM AT LEAST ONE
**CHRONIC
DISEASE**

CHRONIC DISEASES

ACCOUNT FOR **\$3** OF EVERY **\$4**

SPENT ON HEALTHCARE

OF **ALL DEATHS** ARE
CAUSED BY ONE OR MORE OF
5 CHRONIC DISEASES

- HEART DISEASE
- CANCER
- STROKE
- COPD
- DIABETES

CHILDHOOD OBESITY

Childhood Obesity Rates have tripled since the 1970's

More likely to be Teased and have Self-Esteem Issues...

More Likely to have Risk of Other Chronic Health Issues for Longer Period of Time...

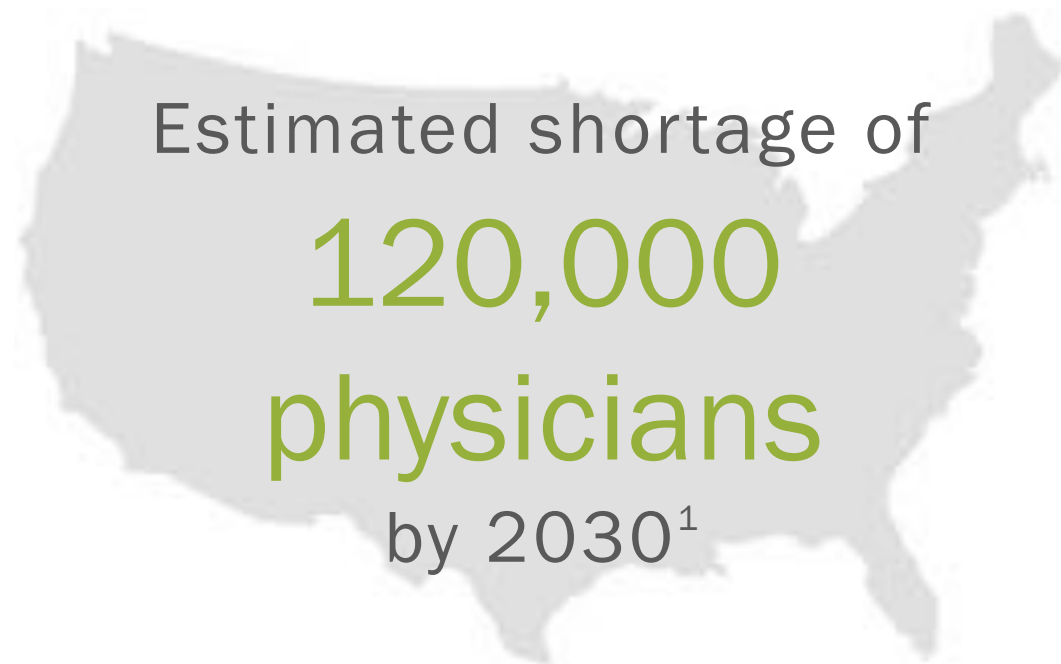

More Likely to be Obese as an Adult with All of the Associated Health Issues...

Just Over 70% Of All Americans Are Either Overweight Or Obese

COORDINATED CARE

PHYSICIAN SHORTAGE

2/3 of hospitals and **47%**
of GP's report vacancies

3/4 of these have been
unfilled for more than 6
months²

TELEMEDICINE ADOPTION

TELEHEALTH PROGRAM MATURITY, BY CARE SETTING

TOP SPECIALTY APPLICATIONS

Stroke

Psychiatry

Neurology

Radiology

Pediatrics

WHAT IS TELEMEDICINE?

WORLD HEALTH ORGANIZATION FINDINGS

Telemedicine **overcomes geographical barriers** and increases access to health care services

Telemedicine has the potential to provide **accessible, cost-effective, high-quality health care** services in both developed and developing countries

Approximately **30%** of responding countries have a national **agency for the promotion and development of telemedicine**

Developing countries are as likely as developed countries to have such an agency

NEW ADVANCES IN TELEMEDICINE

Patient-to-Provider

E-visits

Wearables

Secure messaging

Provider-to-Provider

E-consults

Implantables

Second opinion consults

PATIENT-TO-PROVIDER

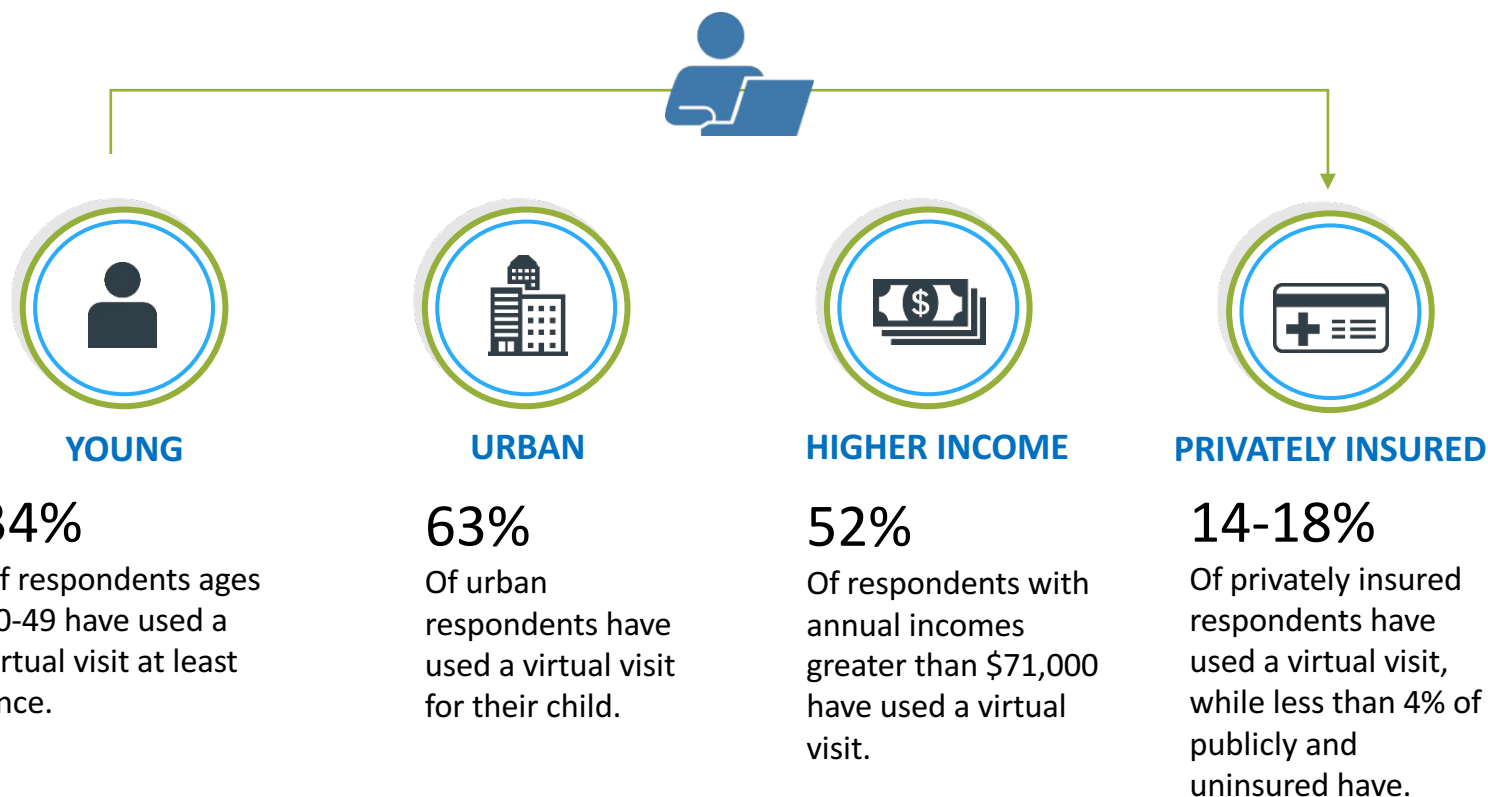

VIRTUAL VISIT

Who Has Used Virtual Visits Before?

EARLY ADOPTERS ARE YOUNG, URBAN, WEALTHIER, AND PRIVATELY INSURED

VIRTUAL VISIT USER CHARACTERISTICS

WHO HAS USED A VIRTUAL VISIT BEFORE?

19%

Of respondents reported having used at least one virtual visit before

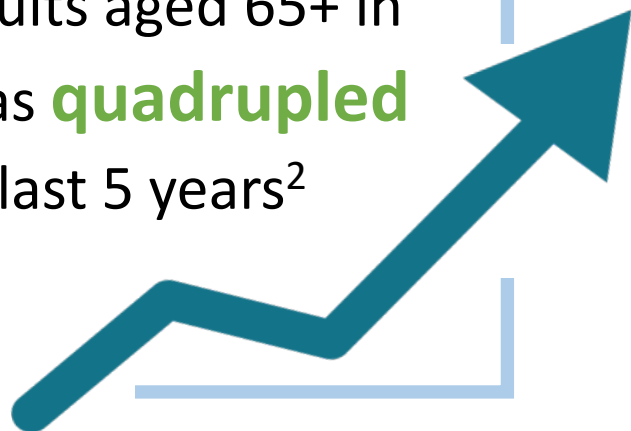

39%

Of parents reported having used a virtual visit for their child

Bring Your Own Device

Powerful Health Tools that Most Patients Already Own

Smartphone adoption
among adults aged 65+ in
the U.S. has **quadrupled**
in the last 5 years²

CHRONIC CARE MANAGEMENT

Better managing chronic care results in improved quality of life for patients

“Pillbox sensors” that track compliance and communicate providers may improve chronic care management

PEOPLE WITH CHRONIC CONDITIONS ACCOUNT FOR:

Poor medication adherence is estimated to cause as much as

\$290 billion

a year in higher US medical costs

of hospital admissions

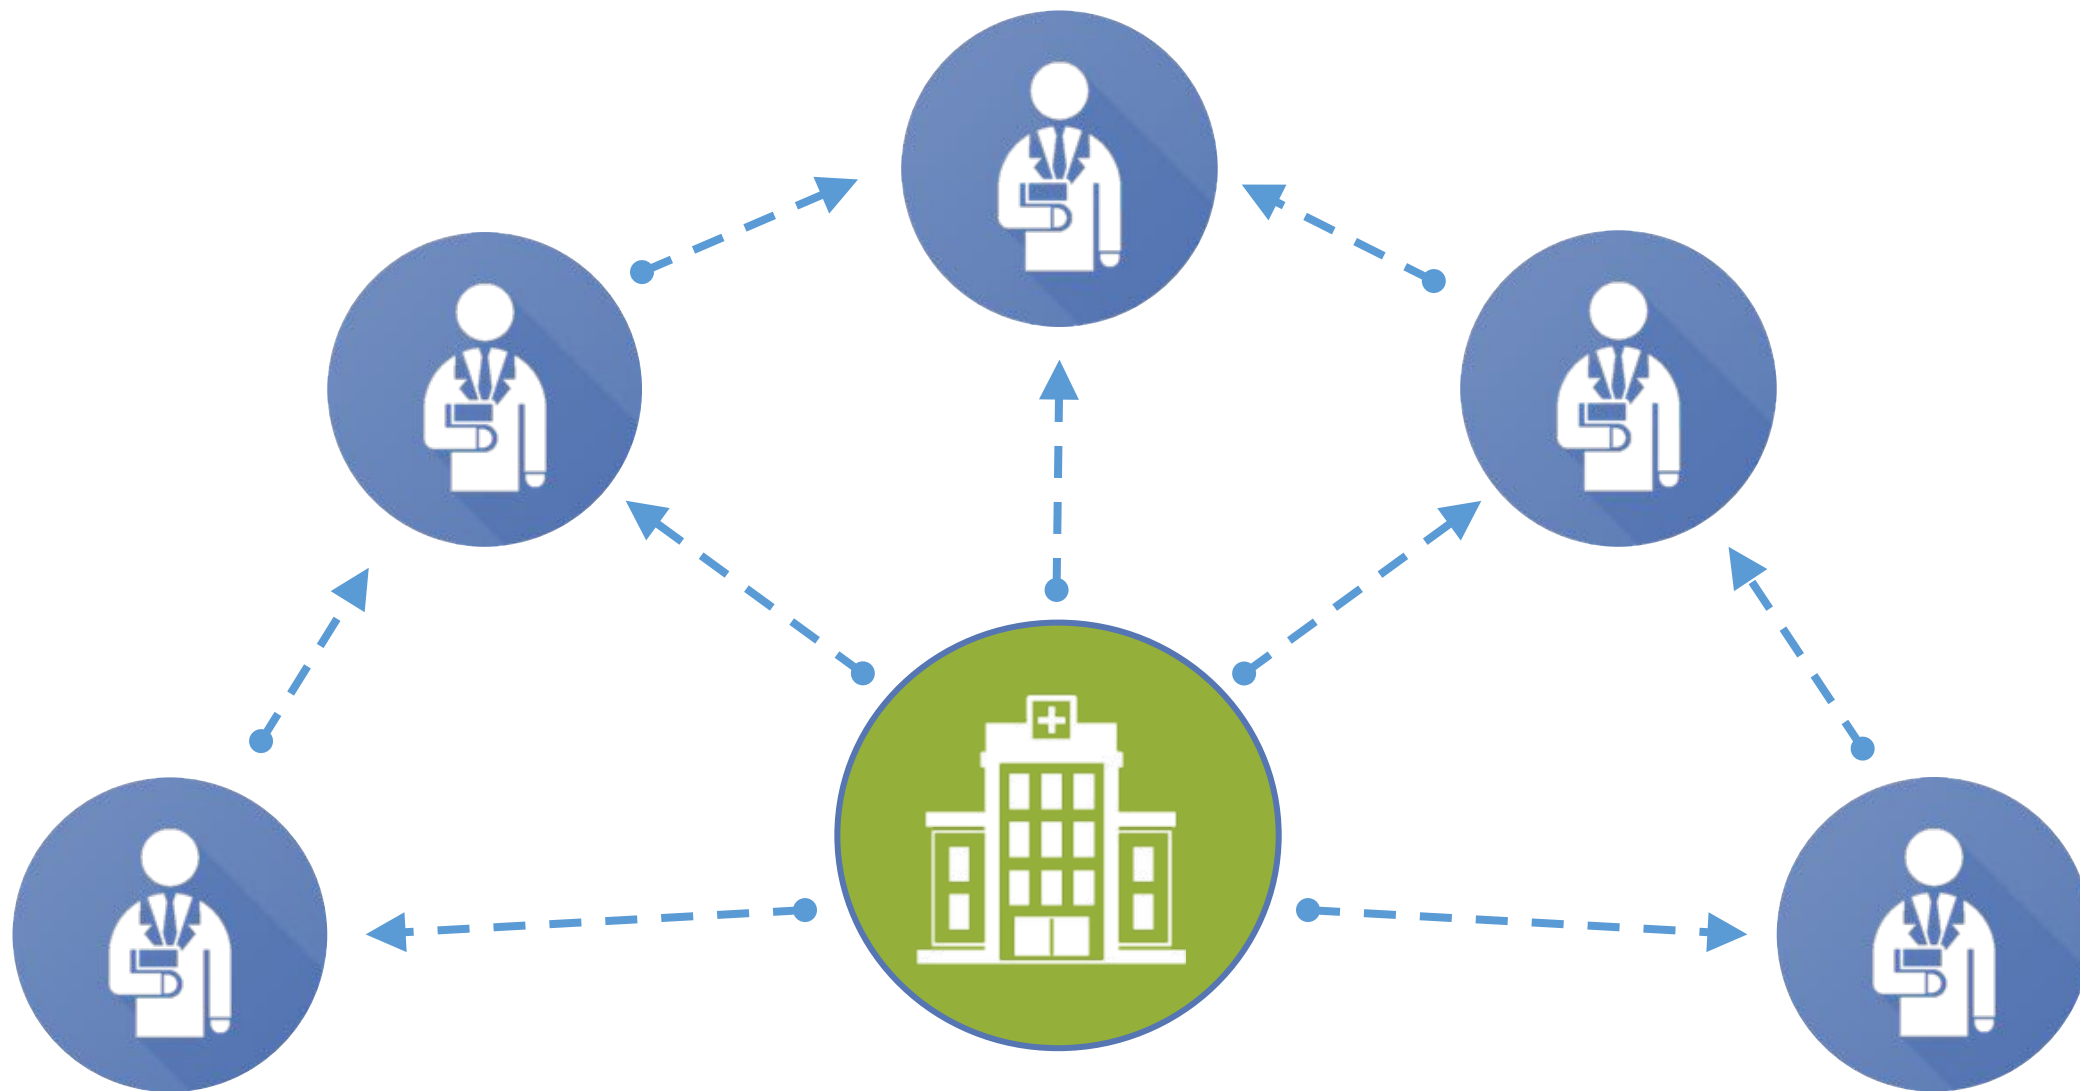

of all prescriptions filled

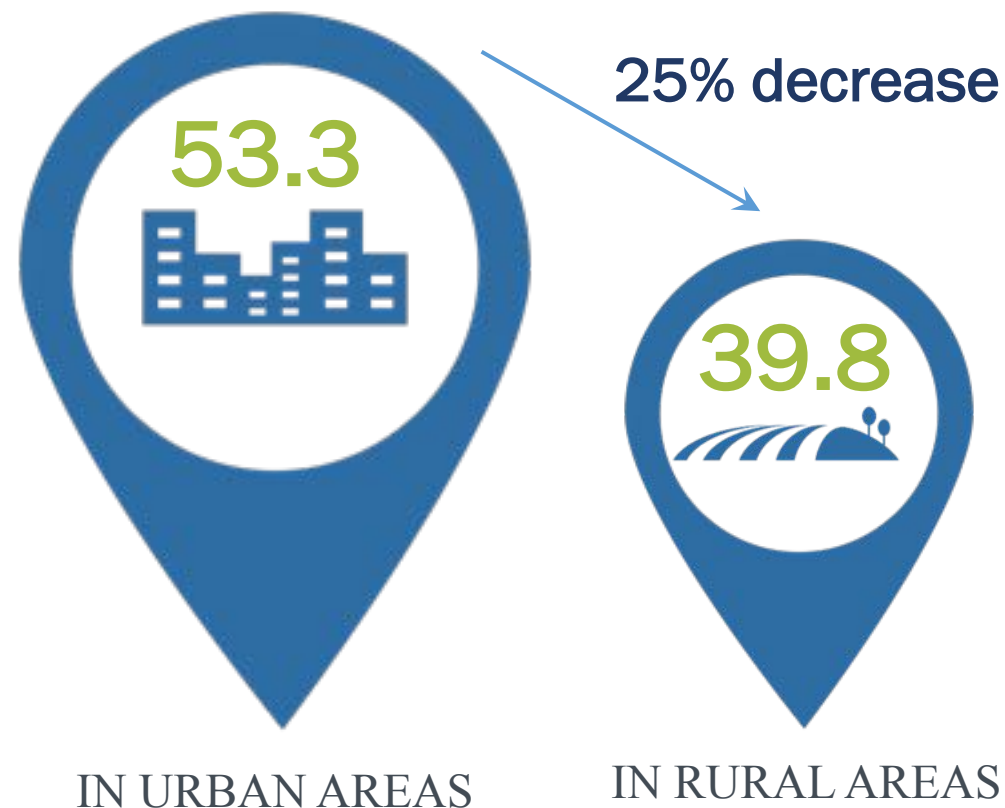

of all physician visits

PROVIDER-TO-PROVIDER

ACCESS TO SPECIALISTS

THE PATIENT-TO-PRIMARY CARE PHYSICIAN RATIO, PER 100,000 PHYSICIANS IS:

Between 2005 and 2016,
118 rural US hospitals
closed permanently

“Access to providers, even family physicians, is a problem. If you want to go to an OB/GYN, depending on where you live in the country, you may have to go 200 miles.”

Gary Hart, PhD

University of North Dakota School of Medicine and Health Sciences

OPPORTUNITIES FOR CLINICIAN ENGAGEMENT

The reduced physical demands of telehealth work might prolong the careers of knowledgeable physicians who might otherwise retire.

43%

OF US PHYSICIANS ARE
55 YEARS OLD OR OLDER

Percent of US Physicians 55 or Older

WHERE IS TELEMEDICINE?

TELEMEDICINE EXAMPLES

	INPATIENT	OUTPATIENT/ SPECIALTY	PRIMARY CARE	EMERGENCY	POST-ACUTE/ CHRONIC CARE
					
PATIENT:	Fixed	Fixed or Mobile	Fixed or Mobile	Fixed or Mobile	Fixed or Mobile
CLINICIAN:	Fixed or Mobile	Mobile	Mobile	Fixed or Mobile	Mobile

INPATIENT

CINCINNATI CHILDREN'S HOSPITAL

22 Miles (35.4 km)

SAME DISTANCE AS NICE TO CANNES, FRANCE

INPATIENT

CINCINNATI CHILDREN'S HOSPITAL

100% of patient rooms at the Liberty Campus are telemedicine capable

Cincinnati Children's Telehealth Network

lends expertise to providers around the world

OUTPATIENT / SPECIALTY

ANN B. BARSHINGER CANCER INSTITUTE

80 Miles (128.7 km)

SAME DISTANCE AS ZÜRICH TO BERN SWITZERLAND

OUTPATIENT / SPECIALTY

ANN B. BARSHINGER CANCER INSTITUTE

Multidisciplinary clinic

5 neighborhoods

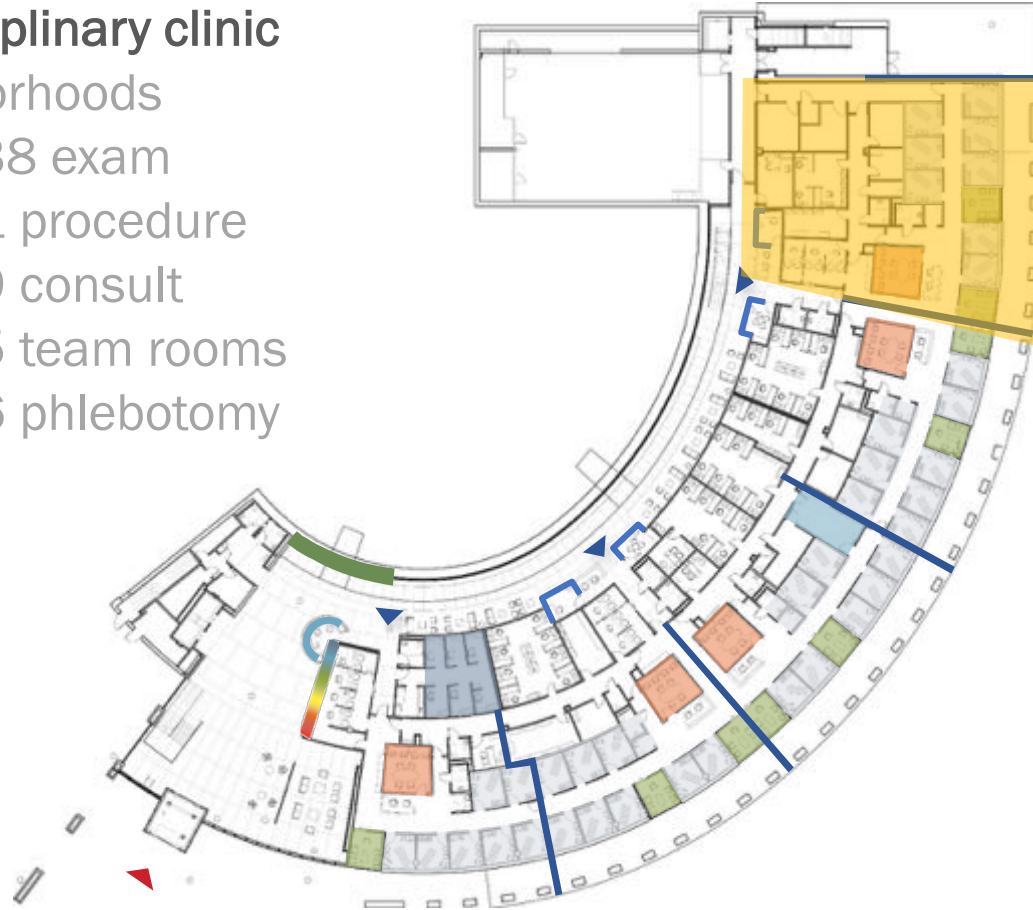

38 exam

1 procedure

9 consult

5 team rooms

6 phlebotomy

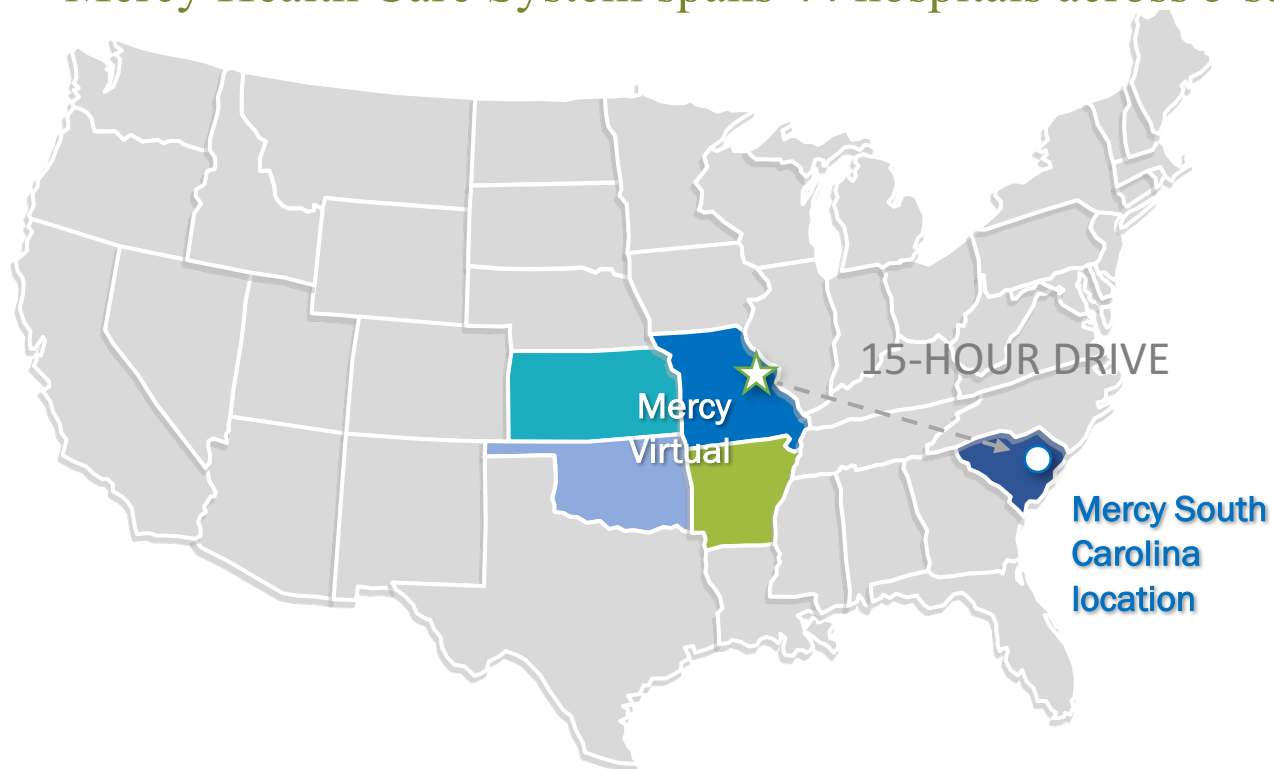

PRIMARY CARE +

MERCY VIRTUAL

Mercy Health Care System spans 44 hospitals across 5 states

843 Miles (1,356.7 km)

SAME DISTANCE AS AMSTERDAM, THE NETHERLANDS TO FLORENCE, ITALY

PRIMARY CARE +

MERCY VIRTUAL

In the United States, only **1** out of **10** U.S. doctors practice in rural areas, while nearly **1** in **4** Americans live in these areas

SERVICES:

- Mercy SafeWatch (ICU)
- Home Monitoring
- Nurse-On-Call
- Telestroke

330 specialized medical professionals available 24/7/365

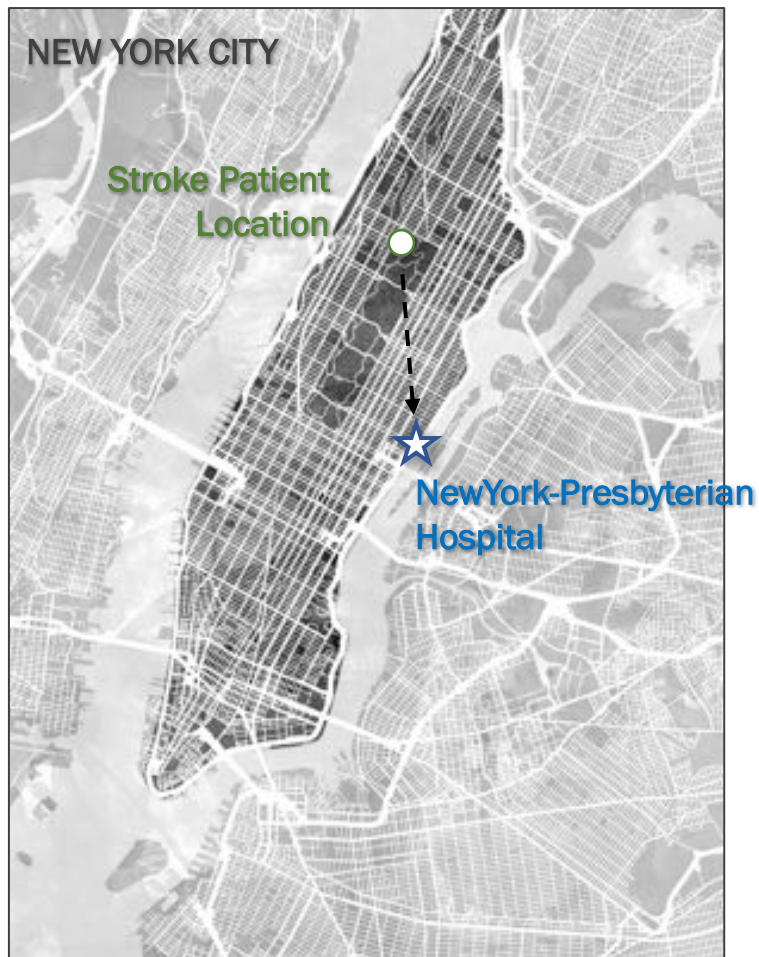

WORLD'S FIRST FACILITY DEDICATED TO TELEHEALTH

EMERGENCY

NEWYORK-PRESBYTERIAN HOSPITAL

30-MINUTE DRIVE

3.5 Miles (5.6 km)

SAME DISTANCE AS CANARY WHARF TO THE SHARD

EMERGENCY

NEWYORK-PRESBYTERIAN HOSPITAL

The Mobile Stroke Treatment Unit allows **1 neurologist** to oversee care on **multiple ambulances**

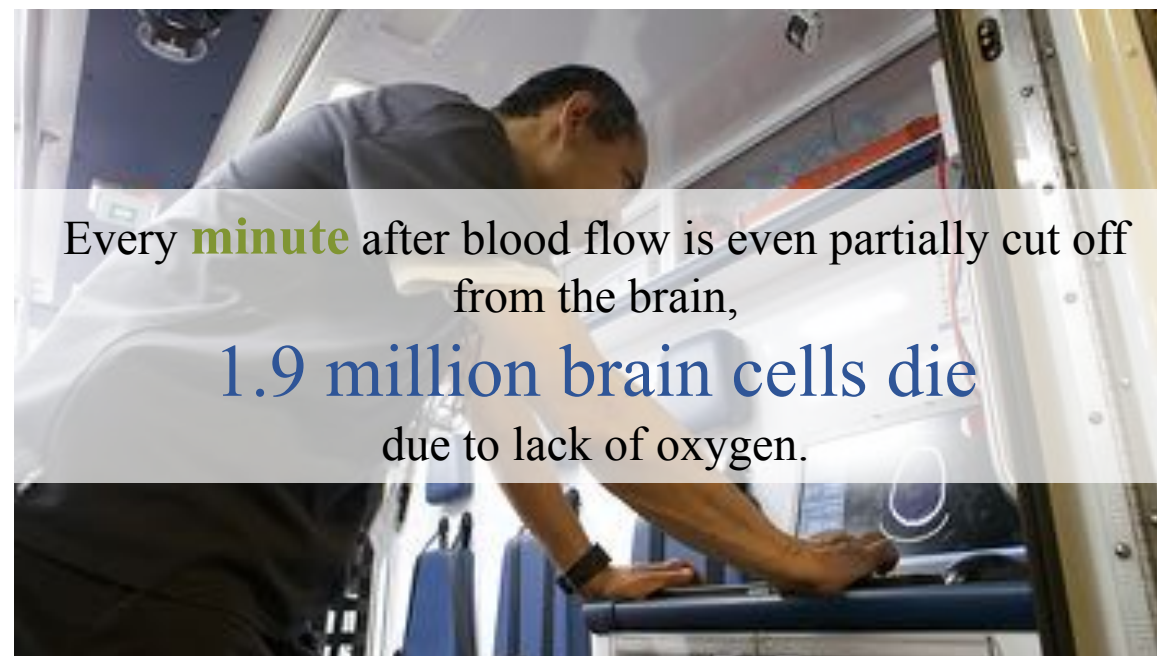

Microphone and speakers for audio transmission between ambulance and neurologist

Adjustable camera with high-def imaging for neurologist to view patient

	Traditional Ambulance	Mobile Stroke Treatment Ambulance
Access to Neurologist	X	✓
Confirmed Diagnosis of Stroke	X	✓
Advanced Stroke Care Medications	X	✓

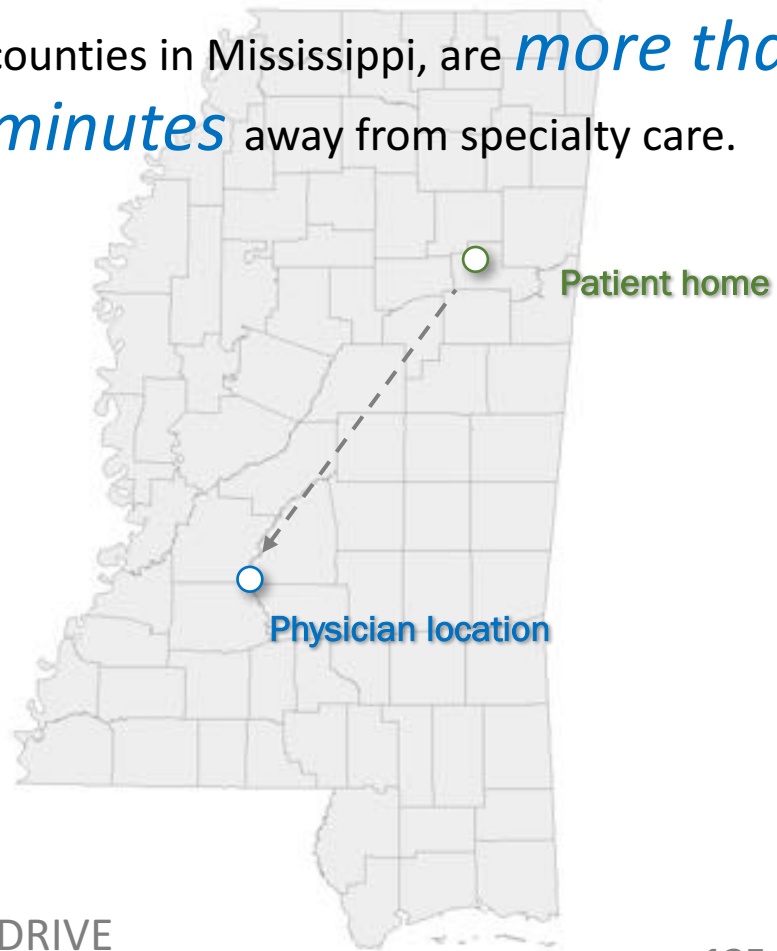

Every **minute** after blood flow is even partially cut off from the brain,
1.9 million brain cells die
 due to lack of oxygen.

POST-ACUTE / CHRONIC CARE

UNIVERSITY OF MISSISSIPPI MEDICAL CENTER, CENTER FOR TELEHEALTH

65% counties in Mississippi, are *more than 40 minutes* away from specialty care.

2.5-HOUR DRIVE

125 Miles (201 km)

SAME DISTANCE AS LONDON TO BIRMINGHAM

UNIVERSITY OF MISSISSIPPI MEDICAL CENTER

DIABETES CARE CENTER

Mississippi had the *highest %* of adults diagnosed with **diabetes** in 2010

In 2012, Mississippi spent **\$2.74 billion** on diabetes-related medical expenses

100

Study Participants
with Diabetes
Across Mississippi

POST-ACUTE / CHRONIC CARE

UNIVERSITY OF MISSISSIPPI MEDICAL CENTER, CENTER FOR TELEHEALTH

RESULTS:

0 participants *were hospitalized or visited an emergency room*, saving payers **\$339,184**

Participant medication compliance reached **96%**

Participants saved **9,454 miles** of driving to specialists

Health session participation reached **83%**

Participant mean hemoglobin A1c levels decreased by **1.7%**

Mississippi is estimated to save approximately **\$189 million/year**

Reimbursement for remote monitoring is set at **\$16/day** or \$480 monthly

CHALLENGES

TELEMEDICINE PROGRAM CHALLENGES

PRIVACY LAWS

General Data Protection Regulation (GDPR)

Legal framework for the collection and processing of personal information of individuals within the EU. It sets out the principles for data management and the rights of the individual.

Health Insurance Portability and Accountability Act (HIPAA)

US law designed to provide privacy standards to protect patients' medical records and other health information provided to health plans, doctors, hospitals and other health care providers

PATIENT PREFERENCES

According to healthcare futurist Nicholas Webb, 50% of clinical visits are moving to the digital realm because only 10-15% of exams need physical exams

ACCESS TO TECHNOLOGY

53%

OF RURAL AMERICANS LACK
HIGH-SPEED INTERNET ACCESS

**THE US STATE OF MISSISSIPPI'S
SOLUTION WAS TO PROVIDE FREE
BROADBAND INTERNET FROM
CSPIRE**

HUMANIZING TELEMEDICINE

SMARTPHONE +
WEARABLE SENSORS

AI+ MACHINE
LEARNING

INGESTIBLE
SENSORS

VR + AUGMENTED
REALITY

EMERGING

“Ultimately healthcare comes down to **human-to-human interaction**. So if you are going to go into **artificial intelligence, machine learning**, etc., it’s got to be able to **re-humanize**, as opposed to de-humanize care.”

Dr. Stephan Cowin
CEO, New York Presbyterian

IBM WATSON

HOPE FOR HEALTHCARE

“Yes, we need the *science*. Yes, we need the Spock-type *intelligence*. And yes we need great *management* skills.

But **what will allow us to escape the vortex of America's distributive model** of pharma, insurers, providers all fighting with each other over money, is **not necessarily going to be logic.**

It's going to be **bold, creative and maybe disruptive** approaches to figuring out the cost, access, patient experience and quality **issues we now face.”**

Stephen Klasko
President and CEO, Thomas Jefferson University

THANK YOU
